## SKILLS

**Languages:** C++, Java, JavaScript, TypeScript

**Frameworks/Libraries:** Next.js, React.js, Node.js, Express.js, Tailwind CSS, GSAP

**Databases:** MongoDB, PostgreSQL, MySQL

**Developer Tools:** Git, GitHub, VS Code, Vercel, Postman, Docker

**APIs:** REST APIs, Gemini API, Web Speech API

## PROJECTS

**Campunex - Campus Ride-Matching Platform** | Next.js, Node.js, PostgreSQL, PostGIS, Redis, WebSockets |

[Live](#) | [Repo](#)

Aug 2026

- Architected a **geospatial ride-matching system** using PostgreSQL and PostGIS to match riders with drivers based on route overlap within a **500-meter proximity threshold**.
- Enabled** real-time GPS tracking and trip-state synchronization through WebSockets, providing live driver location updates during active rides.
- Secured** ride initiation and completion through institutional identity verification, Redis-based geospatial caching, and dual 4-digit OTP authentication.

**Devnoesis - CS Learning & Developer Intelligence Platform** | Next.js, React.js, Node.js, Express.js, TypeScript,

PostgreSQL, Prisma, Redis, BullMQ | [Live](#) | [Repo](#)

Aug 2026

- Built** a full-stack developer telemetry platform using Node.js, Express.js, PostgreSQL, and Prisma to aggregate coding and repository activity from GitHub, LeetCode, and Codeforces APIs.
- Orchestrated** asynchronous API synchronization using Redis caching and BullMQ background workers with rate limiting, retry handling, and activity processing.
- Modeled** a CS knowledge graph using **DAG-based prerequisite relationships** and applied the **SM-2 spaced-repetition algorithm** to generate personalized topic revision schedules.
- Calculated** a dynamic Placement Readiness Score (0–100) combining coding activity, core CS coverage, repository consistency, and preparation metrics in a unified Next.js dashboard.

**AI FanFic - AI-Powered Story Generation Platform** | React.js, JavaScript, Tailwind CSS, Gemini API, Web Speech API,

Framer Motion | [Live](#) | [Repo](#)

Mar 2026

- Integrated** Google Gemini API to build an AI-powered storytelling platform supporting **3 creative modes**: real-time text chat, voice-based storytelling, and image generation.
- Enabled** personalized story generation across **5+ fandom universes**, with configurable genres and narrative tones for customized storytelling experiences.
- Implemented** streaming AI responses, Web Speech API voice input, responsive theme switching, and Framer Motion animations in a **fully responsive React.js application** deployed on Vercel.

## TRAINING

**Center for Professional Enhancement, Lovely Professional University**

Jun 2026 – Jul 2026

Advanced Backend Development with Node.js, Express and MongoDB | [Certificate](#)

- Completed an **Advanced Backend Development** training program focused on building server-side applications using **Node.js, Express.js, and MongoDB**.
- Developed practical understanding of **backend application development, server-side programming, Express.js-based application architecture, and MongoDB database integration** through structured technical training.
- Earned **Grade A and Certificate of Merit** upon successful completion of the program conducted from **12 June 2026 to 27 July 2026**.

## CERTIFICATES

**Database Management System Part - 1** — Infosys | [Certificate](#)

Aug 2026

**Programming in Java** — iamneo - an NIIT Venture | [Certificate](#)

May 2026

**Generative AI** — NASSCOM Skill Development Program | [Certificate](#)

Mar 2026

## EDUCATION

**Lovely Professional University**

B.Tech — Computer Science and Engineering | Expected 2028

CGPA: **8.07/10**

Phagwara, Punjab

Aug 2025 – Present

**Vidya Memorial Institute of Technology**

Diploma — Mechanical Engineering

Percentage: 83%

Ranchi, Jharkhand

Jul 2023 – Jul 2025
